DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 12/07/2006 has been fully considered. An initialed copy of said IDS is enclosed herein.

Drawings

2. The drawings filed 03/07/2006 are accepted.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 2 and 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims state the layer is 10-60% but it does not state to what property the percentage refers (thickness, crystalline, etc). For examination purposes, said limitation is understood to read on thickness.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1794

6. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 7-195618A (herein referred to as Toyo).

Toyo teaches a laminate comprising a metal substrate layer, a layer comprising 75-99wt% polyester and 25-1wt% ionomer (layer B), and an outer layer (layer A) comprising a saturated polyester resin layer derived from dicarboxylic acid consisting of 99-85wt% terephthalic acid and 1-15mol% isophthalic acid and a dihydroxy compound (abstract). The product is made into a squeeze can (title). The thickness of layer A to layer B is 2:1-1:9 (0042).
